WORK EXPERIENCE

● Front-end Developer

Middle: Sep 2021 – now, Junior: Aug 2020 – Sep 2021

3ITECH, MOSCOW

- Maintain and develop speech recognition analytical service using Angular, which allows users to upload files, search through million of documents with advanced filters (Elasticsearch), create and edit charts (amCharts), dashboards and other interactive analytical features
- Develop new version of the service with React and TypeScript
- Cooperate with back-end developers for Rest API integration
- Implement design from Figma with HTML and CSS/Sass using BEM class notation

Main accomplishments:

- Implemented the dashboard module where user can set dashboard size and grid, drag-and-drop and resize its elements
- Developed the service allowing client to monitor their network infrastructure with Zabbix data, including view and manage its hosts and services tree, get performance graphic representation
- Created modal dialog service (an analog of native prompt and confirm) which allowed to delete around 100 modal forms consistency of which were hard to maintain
- Initiated additional education through FrontendMasters platform for the team

● Learning Front-end Development

Nov 2018 – Jul 2020

SHENZHEN, CHINA

In 2018 moved China because of husband's work and started to learn front-end basics by myself with resources such as HarvardX, freeCodeCamp, FrontendMasters, Udemy, etc. As a result made portfolio ulya.dev with projects using React, Firebase, Node.js, Express, MongoDB which allowed to find a job without a professional experience, when moved back to Moscow.

● Senior Project Manager

Aug 2016 – Oct 2018

PIK GROUP, MOSCOW

Coordinated the team of 5 people managing sales strategy and pricing policy for 40 residential complexes. Participated in Business Intelligence system development (technical task, testing).

● Strategy Consultant

Dec 2013 – Aug 2016

COLLIERS INTERNATIONAL, MOSCOW

Provided retail market analysis, feasibility studies and shopping mall concept development.
